EDUCATION

Kendriya Vidyalaya (KV)

Class XII: 77% | Passed in 2023
Class X: 92% | passes in 2021

Bachelor of Technology (B.Tech)
Centurion University Technology and Management
Currently in Third Year
CGPA: 9.3

SKILLS

- Project Management
- Public Relations
- Teamwork
- Time Management
- Leadership
- Effective Communication
- Critical Thinking

PROFILE

Third-year B.Tech student with a strong interest in software engineering, artificial intelligence, and research-oriented development. Experienced in developing academic software projects using Kotlin, Android, Angular, Java, and Spring Boot. Currently contributing to research on deep learning-based brain tumor segmentation using MRI scans, involving medical image preprocessing, segmentation architectures, and model evaluation. Interested in applying programming, problem-solving, and machine learning skills to research-driven software development at IBM Research.

KEY ACHIEVEMENTS

- Google Cloud Gen AI Exchange Hackathon — Participated as part of team The Neural Nexus, developing a generative AI prototype and advancing to the grand finale.
- Smart India Hackathon — our team secured a Top 5 position in the Internal Smart India Hackathon 2025.
- AI Internship at Plasmid Innovation — Completed technical deliverables and analysis covering K-Means Clustering and Spam Detection models.
- Reliance Foundation Scholarship — Successfully qualified through the national online aptitude examination selection process.

Full-Stack & Mobile Development — Built and deployed notable projects including:

- UniGuide: Native Android mobile application built with Kotlin and Jetpack Compose for campus directories and routing.
- Brain MRI Segmentation Pipeline: Designed and trained deep learning models (U-Net, Attention U-Net, ResUNet, EfficientUNet) for medical image analytics.
- Property Search & Virtual Tour Platform: Engineered a full-stack platform pairing an Angular frontend with a Spring Boot REST API.
- MediSarthi - AI-powered patient case-taking software developed for healthcare environments.
- Artifact - a platform designed to support local artisans by helping them showcase their products digitally.
- Brainiac - a gamified learning platform for rural education with the mission to make learning more engaging, accessible, and interactive for students in underserved regions.
- NagarSetu – Citizen Service digital platform designed to connect citizens with government services;

TECHNICAL STACK

Mobile Development	Jetpack Compose, Kotlin, Android Studio, Android SDK, Material Design 3
AI & Deep Learning	PyTorch, U-Net Segmentation, Computer Vision (OpenCV), Python, NumPy, Scikit-Learn
Frontend Web	Angular, React.js, TypeScript, RxJS, JavaScript (ES6+), Tailwind CSS, HTML5/CSS3
Backend & Databases	Java (JDBC/Servlets), PHP, Laravel, MySQL, RESTful APIs, Apache Tomcat
Developer Tools	Git & GitHub, Oracle Cloud Infrastructure (OCI), Postman, Anaconda, VS Code
